

[METHOD FOR SENDING A WEB PAGE TO A FACSIMILE MACHINE]

Abstract of Disclosure

A method for sending a web page to a fax machine includes a first computer capable of accessing a web page, a fax machine identified by a fax number and capable of receiving fax signals, and a transmission means connecting the fax machine to the first computer. The computer converts the web page into a fax signal and transmits the fax signal to the fax machine using the transmission means. The fax machine prints the fax signal representing the web page. Another computer can also send a fax signal through a computer network to the computer that is connected to a fax machine, and in this way print a web page at the fax machine.

Figures

Figure 1: A line graph showing the relationship between the number of hours spent on a task and the number of errors made. The x-axis represents 'Hours' (0 to 10) and the y-axis represents 'Errors' (0 to 10). The data points are as follows:

Hours	Errors
1	1
2	2
3	3
4	4
5	5
6	6
7	7
8	8
9	9
10	10
